

# What is Premier McGuinty Thinking?

Why is it okay to put an inefficient, outmoded, **gas-fired power plant** in the Holland Marsh, **Ontario's most productive agricultural community**?

Why is it okay to locate this factory in the **Provincially-protected Greenbelt**, while there are alternative solutions?

What about the impact of 900°F emissions on the Marsh's unique micro climate and air quality for the homes and school next door?

What about the **toxins on our vegetables** growing across the street?

What about our **\$500 million** bill for a **short term solution** that will operate less than 10% of the year.

Tell Premier McGuinty what you think, sign the petition at [www.megawhat.ca](http://www.megawhat.ca)
